**Elaine N. Marieb, Katja N. Hoehn : Anatomy Physiology (5th Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Anatomy Physiology (5th Edition):

0 of 0 people found the following review helpful. LOOSE LEAF - 3 ring binder styleBy PGH KarenI now see that it lists loose leaf in the description AFTER you open it, but I obviously missed it. Thought I'd save someone else from possibly ordering the wrong thing if you were thinking this was the actual book. I gave it 2 stars because it is useful if you just want copy paper and they did note that it was loose leaf, but I think it should say that on the main portion of the description. Was also VERY disappointed that I tried to cancel the order immediately after the order was placed and I kept getting a message "We're sorry. An error occurred when we tried to process your request. Rest assured, we're working to resolve the problem as soon as possible. Please try again in a few minutes." If they didn't want to cancel and instead want me to eat the cost of shipping the order just say so ... don't tell me there's some sort of mysterious error.1 of 1 people found the following review helpful. before bookstore from now on!By Cody ColeI am extremely happy with this purchase! I received my package two days after ordering it. The package included the AP

text book, A brief atlas of the human body, the disk, and the access code for mastering AP! I'm so glad it came with everything I needed for school. The purchase saved me a lot of money I would have spent in the campus bookstore. 0 of 0 people found the following review helpful. Nutrition studentBy ToriI have to use this book for a grad school pre-req AP course. The textbook is incredibly informative--moreso than the one my mother had to use for her AP 12 courses when she went to become a MA. The only drawback is that the authors can get a little TOO detailed and can sometimes forgo important details that would otherwise make the topic a bit more accessible. I want to go into nutrition, so a lot of the information I get bombarded with does not apply to the field I want to enter. It's unfortunate, because I am taking an online course, so I need to treat each and every section equally, which means obtaining a general understanding of everything the authors present to you. It's not a bad thing, trust me, but it can get overwhelming at times and I know I will not remember a lot of the information once my course is over. Love the supplemental website that comes with this book. Have utilized said website for test reviews multiple times now and have maintained an A in the course because of all the extra practice. One more section for AP 1 and then I am done for the semester, woo hoo!

NOTE: This is the standalone book. Anatomy Physiology, Fifth Edition answers the demand for a leaner version of Elaine Marieb and Katja Hoehns top-selling Human Anatomy Physiology while maintaining its trusted, accurate approach. This streamlined text excludes coverage of pregnancy human development, heredity, and the developmental aspects of body systems, while maintaining coverage of key AP concepts. Marieb draws on her career as an AP professor and her experience completing her nursing education; Hoehn utilizes her medical education and award-winning classroom instruction together, they explain anatomy physiology concepts and processes in a meaningful and memorable way. The new Fifth Edition makes it easier for you to learn key concepts in AP by presenting information in smaller and more digestible bites, making it easier to distinguish key concepts from supporting details. If the customer wants the book/access code order the ISBN below: 0321967305 / 9780321967305 Anatomy Physiology MasteringAP with Pearson eText -- ValuePack Access Card 5/e Package consists of: 0321861582 / 9780321861580 Anatomy Physiology 5/e 0321887913 / 9780321887917 MasteringAP with Pearson eText -- ValuePack Access Card -- for Anatomy Physiology 5/e

About the Author For Elaine N. Marieb, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience, along with stories from the field-including those of former students, now in health careers-that has informed the development of the unique perspective and accessibility for which her texts and laboratory manuals are known. In her ongoing commitment to students and her realization of the challenges they face, Dr. Marieb has given generously to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by providing several full-tuition scholarships each year for women returning to college after a hiatus or who are attending college for the first time and would otherwise be unable to continue with their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and generously contributed to the University of Massachusetts at Amherst where she provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory that bears her name. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings "InterActive Physiology" CD-ROM series, and is an active member of the Human Anatomy and Physiology Society (HAPS). "Anatomy Physiology," Second Edition is the latest expression of her commitment to student needs in their pursuit of the study of AP.
