Kevin T. Patton : Anthony's Textbook of Anatomy and Physiology LABORATORY MANUAL before purchasing it in order to gage whether or not it would be worth my time, and all praised Anthony's Textbook of Anatomy and Physiology LABORATORY MANUAL:

1 of 1 people found the following review helpful. Classic Text, Superb Shipping and ServiceBy Shmuel GoldsteinYou can read reviews of this text in other places, and it is indeed a classic. It is easily readable, even for "amateur" students (ie, the lay reader). True, the 7th ed. is an improvement, but are you going to spend all that money for a relatively small difference? For us, it made the difference in purchasing this book vs. not buying it at all. There are reviews, summaries, examples of clinical situations, and "medical language" for which this book is indicated, both the distal and proximal side (ha ha).Next: We ordered this on Nov.21, and even though the earliest delivery estimate was Dec. 22, the book arrived on Dec. 1 !!!! And this was an INTERNATIONAL ORDER (way over to Israel). We are extremely pleased (a bit surprised, but we'll take it), and would recommend this seller to anyone. The was indeed in

good condition, with a few minor notes from previous user(s), but it was described like that. 0 of 0 people found the following review helpful. Five Stars By Grace Wiryawan Expedited shipping. Book as described. Thank you so much! 0 of 0 people found the following review helpful. A little disappointed in the description. By Krissy Doherty I wish the description would have made it clear that this was an unbound book..... I was disappointed that the pages rip easily when put into a 3 ring binder and am constantly worried about it dropping and having the pages spill out.

The Instructor's Guide for the Laboratory Manual includes recommended laboratory exercises with instructions, required materials, and teaching tips.

About the Author Gary A. Thibodeau, PhD, Chancellor Emeritus and Professor Emeritus of Biology, University of Wisconsin River Falls, River Falls, WI; and Kevin T. Patton, PhD, Professor of Life Science, St. Charles Community College, St. Peters, MO, Adjunct Assistant Professor of Physiology, Saint Louis University Medical School, St. Louis, MO
