CAI YU WEN ZHU BIAN : Histology and Embryology before purchasing it in order to gage whether or not it would be worth my time, and all praised Histology and Embryology:

Paperback. Pub Date: 2007 Pages: 277 Language: Chinese in Publisher: Traditional Chinese Medicine Press textbook of medical colleges is different from the reference book. Histology and Embryology have ideological, scientific, advanced, inspiring and applicability. In the writing process, in addition to pay attention to the content, in addition to old to accept the new, particularly highlight the following features: 1. Accurate concept of innovative content and rigorous exposition, simplified narrative non-priority space streamlined. The wording is concise and quick and easy to students to read. The basic content and reference book is divided into two parts, where the reference content the 5th fangsongti, narrative, provide students self-studying, explore new ideas. New Century TCM colleges and planning materials: histology and embryology is a compulsory basic course in medic...
