Alan Stevens MBBS FRCPath : Histology (Case Bound), 1e before purchasing it in order to gauge whether or not it would be worth my time, and all praised Histology (Case Bound), 1e:

0 of 0 people found the following review helpful. Histology: Stevens and Lowe By A Customer This book is well written by two Nottingham University academics, and is well worth its place on any biology/ medical student's bookshelf. the book is clear yet detailed and contains all the information you will need to pass a basic histology course.

From the joint authors of "Clinical Dermatology", this book provides comprehensive coverage of the field of human tissue structure. Taking an integrated approach, it relates tissue structure to function, and to cell biology, physiology and disease processes. Features include up-to-date terminology and techniques which emphasize the increasing importance of histology in clinical medicine and surgery. The content of the text reflects an examining Board's questions.
