Stefan Sperling : Reasons of Conscience: The Bioethics Debate in Germany before purchasing it in order to gauge whether or not it would be worth my time, and all praised Reasons of Conscience: The Bioethics Debate in Germany:

The implicit questions that inevitably underlie German bioethics are the same ones that have pervaded all of German public life for decades: How could the Holocaust have happened? And how can Germans make sure that it will never happen again? In *Reasons of Conscience*, Stefan Sperling considers the bioethical debates surrounding embryonic

stem cell research in Germany at the turn of the twenty-first century, highlighting how the countrys ongoing struggle to come to terms with its past informs the decisions it makes today.

"Reasons of Conscience: The Bioethics Debate in Germany provides an extraordinary example of anthropologys capacity to not only document and critique social worlds but also to open up a space for political and philosophical mediations."
